

MISSION STATEMENT

To improve healthcare quality and costs for the vulnerable in our community through data integration and care coordination.

NEWS HIGHLIGHTS

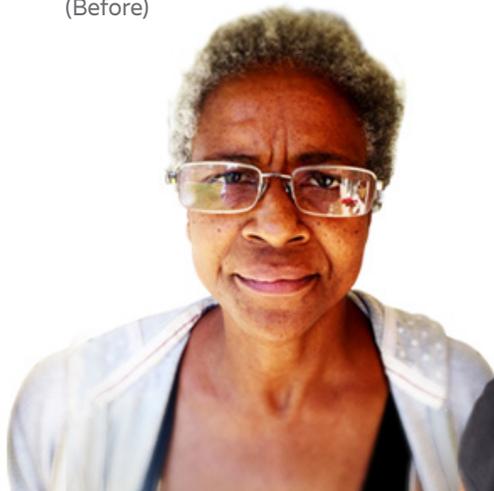

- RoS: Review of Systems podcast with David Buck, MD, MPH, addresses care for high-need, high-cost patients and highlights PCIC's efforts to overcome system barriers like transportation and appointments through technology and unified care plans. Listen Here: <http://bit.ly/2nFJSHD>
- Deloitte Center for Health Solutions: Life Sciences & Health Care Blog; "Health systems are evolving and advancing their strategies to address social determinants of health," by Doug Beaudoin. View Here: <http://bit.ly/2noGpel>
- Catalyst: Blog Post featuring David Buck, MD, MPH, HHH, and PCIC Patient Engagement; "Social interventions can lower costs and improve outcomes," by R. Connor Holton Burke, MS. View Here: <http://bit.ly/2oarOTN>

HUMANS OF HEALTHCARE

Client Success Story: Ms. Loretha

An extreme utilizer of Emergency Medical Services (EMS) calls and transports, Ms. Loretha felt powerless managing her health. Struggling to manage COPD, anxiety, depression, and chronic headaches, she felt trapped - afraid to go outside for fear of exacerbating her COPD. Fortunately, Patient Care Intervention Center (PCIC) identified her through fire department data as a high need, high cost patient, and intervened coordinating health and social care, providing advocacy, building trust, and linking her to a provider.

(Before)

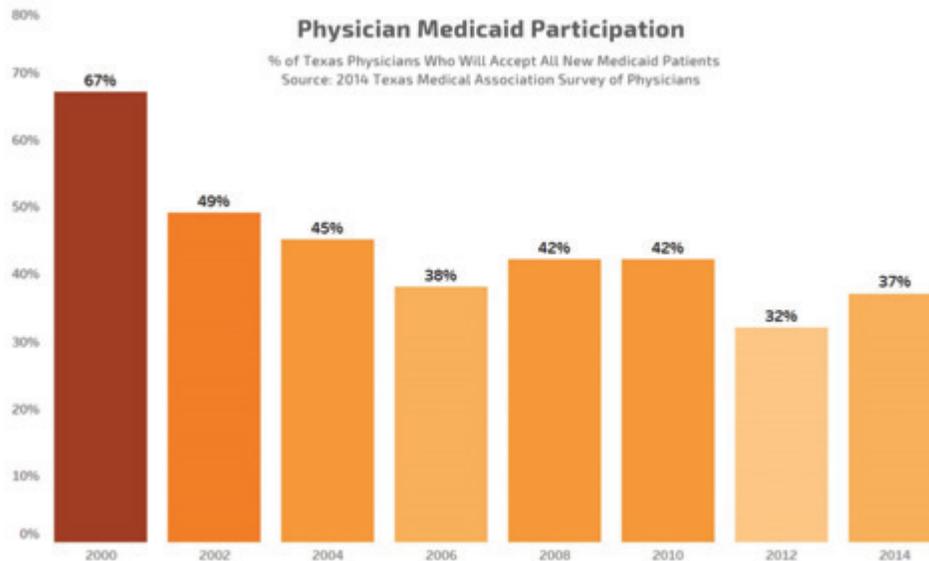

(After)

When our team first started working with her, she could not walk the length of her driveway without becoming short of breath. Upon successful graduation after six months of our Intensive Case Management program, she is now proud to say she can coordinate her own care. Dreams have become reality because Ms. Loretha can run around outside with her grandchildren without becoming short of breath.

Universal Patient Barrier Statistics

Medicaid covers nearly 4.8 million people in the state of Texas (1). However, from 2000 to 2014, the percent of Texas physicians who accepted new Medicaid patients plummeted from 67% to 37%, with only 26% of non-surgical specialists accepting new Medicaid patients (2).

WE RELY ON OUR FUNDERS

We offer a special *Thank You* to The Simmons Foundation for becoming a new PCIC funder. Simmons “is committed to creating a harmonious, dynamic and informed community, where all people have the opportunity to improve their lives.” We look forward to our partnership and are grateful for their commitment. To learn more about The Simmons Foundation please visit <http://www.thesimmonsfoundation.org/>

PARTNER WITH PCIC

We offer a special *Thank You* to our newest partners: Houston Food Bank, Molina Healthcare, Legacy Community Health, and United Healthcare for supporting PCIC’s community efforts.

Are you interested in care coordination and data analytic contracts? We offer both. Consider partnering with PCIC and contact us at <http://pcictx.org/contact> for more information. We look forward to hearing from you.

SOCIAL MEDIA

Have you joined PCIC’s social media? If not, check us out on Facebook, LinkedIn, and Google+.
